FEATURED PROJECTS

- SIBA AI Chatbot — Bilingual University Assistant**
Tech: Python, Google Gemini API, Streamlit, FAISS
 - ▶ Developed a bilingual AI chatbot powered by Google Gemini and Streamlit, deployed to handle student queries on admissions, departments, and academic policies.
 - ▶ Implemented semantic search over an FAQ knowledge base, increasing response relevance and reducing repetitive support requests.
 - ▶ Designed an interactive, mobile-friendly UI enabling real-time conversational interaction.
- File Compressor with Secure Encryption**
Tech: Java, Swing, LZW Algorithm, AES Encryption
 - ▶ Built a GUI-based file compression and encryption tool using the LZW algorithm to reduce file sizes while preserving integrity.
 - ▶ Integrated AES-256 encryption for secure file handling, supporting both compression-then-encryption and decrypt-then-decompress workflows.
 - ▶ Applied core data structures and algorithm design principles to optimize compression performance.
- Supermarket Billing System**
Tech: C++, File I/O, OOP
 - ▶ Developed a console-based application to manage product inventory, customer records, and automated invoice generation.
 - ▶ Implemented purchase tracking, discount logic, and persistent storage using file handling.
- University Campus Network — Multi-Campus Topology**
Tech: Cisco Packet Tracer, Networking
 - ▶ Designed and simulated a multi-campus network topology with VLAN segmentation and inter-campus routing.
 - ▶ Configured routers, switches, and DHCP/DNS services for efficient and secure communication.

Snake Game

Tech: Java, Swing

- ▶ Created a classic Snake game featuring real-time movement, collision detection, and a dynamic scoring system.
